notes:

progression should happen after every study session !!!

Out of this scope

- unlock different themes
- animations
- tutorial (visual novel style)
- pay w/ in game currency to skip a session but gain currency

Prototype Planning:

element #1

Pomodoro timer

- ask user for task name + store
- Start 20-minute count down
- once complete, add earned currency
- 5-minute count down then prompts you to start another task.

element #2

Idle / clicker game

- learn how to make buttons (basis of game)
  - ↳ buttons cause calculation of currency multiplier to increase
- Calculate + display currency earned + currency per study session rate
- button to Start studying
- Save currency before you exit

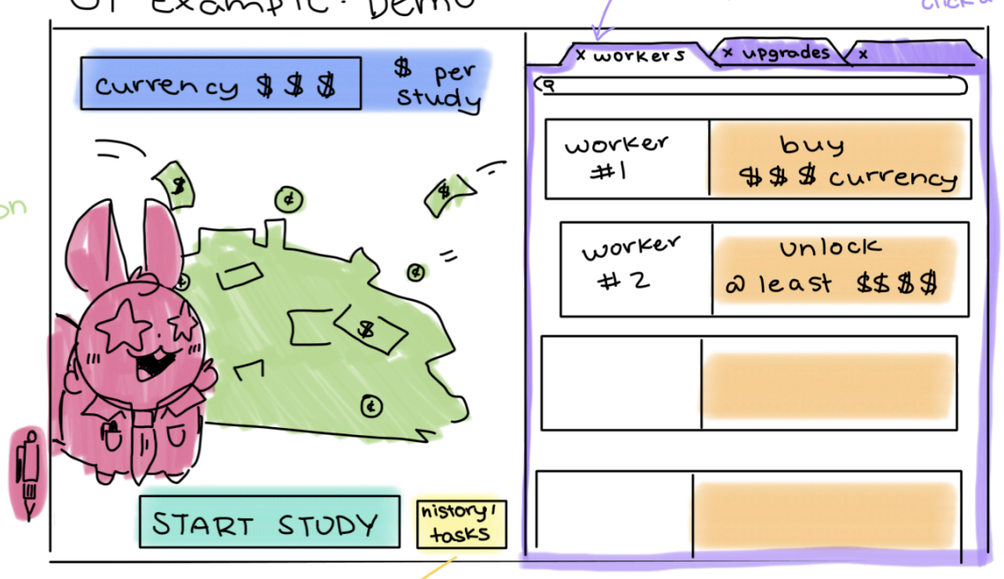

- 1 worker type: addition +3 currency
- 1 upgrade: multiplier x2 currency

element #3 (last)

tasks / tracker

- Study on seperate days total to unlock skill tree / cosmetics.
- Show a history of tasks + total study time.

UI Example: Demo

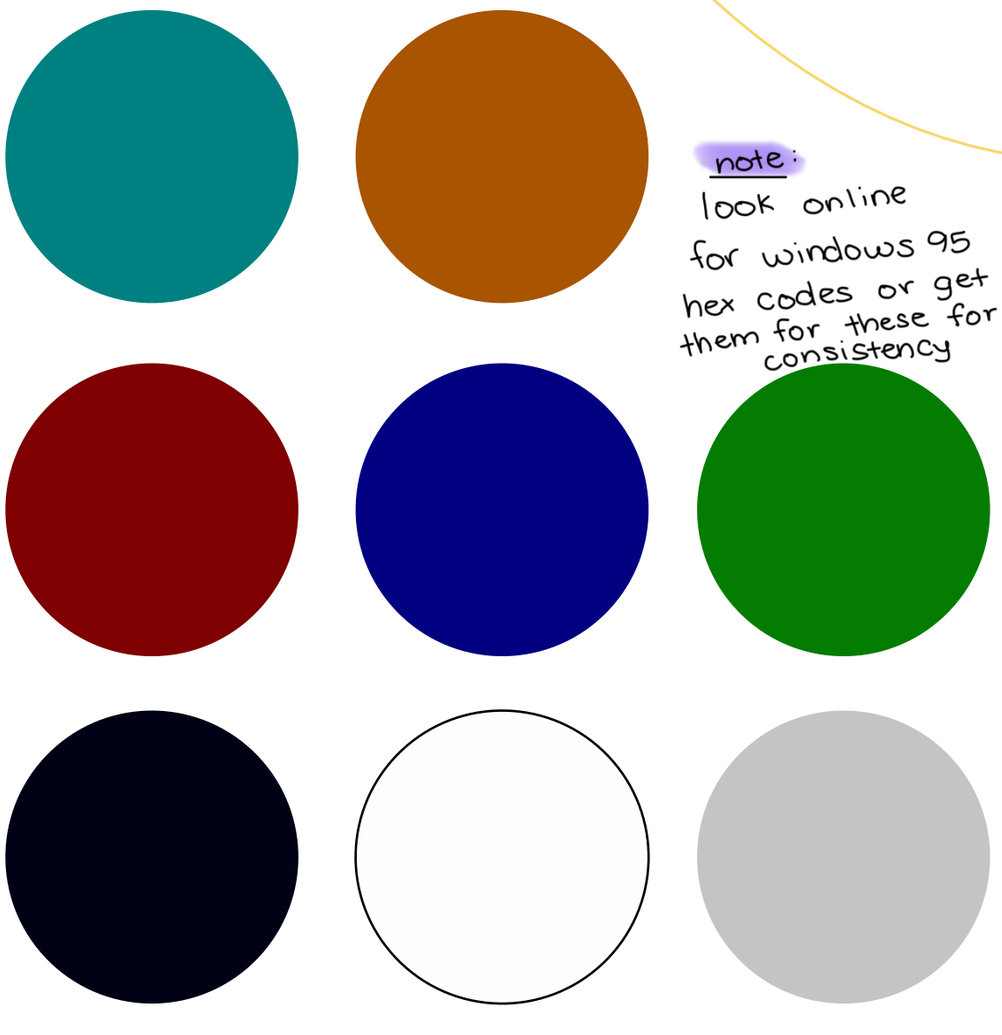

Simple cookie clicker type animation

png style character animatic with comic bubble reactions

upgrade buttons need currecy and need certain amount to be unlocked

Colours:

note:
look online for windows 95 hex codes or get them for these for consistency

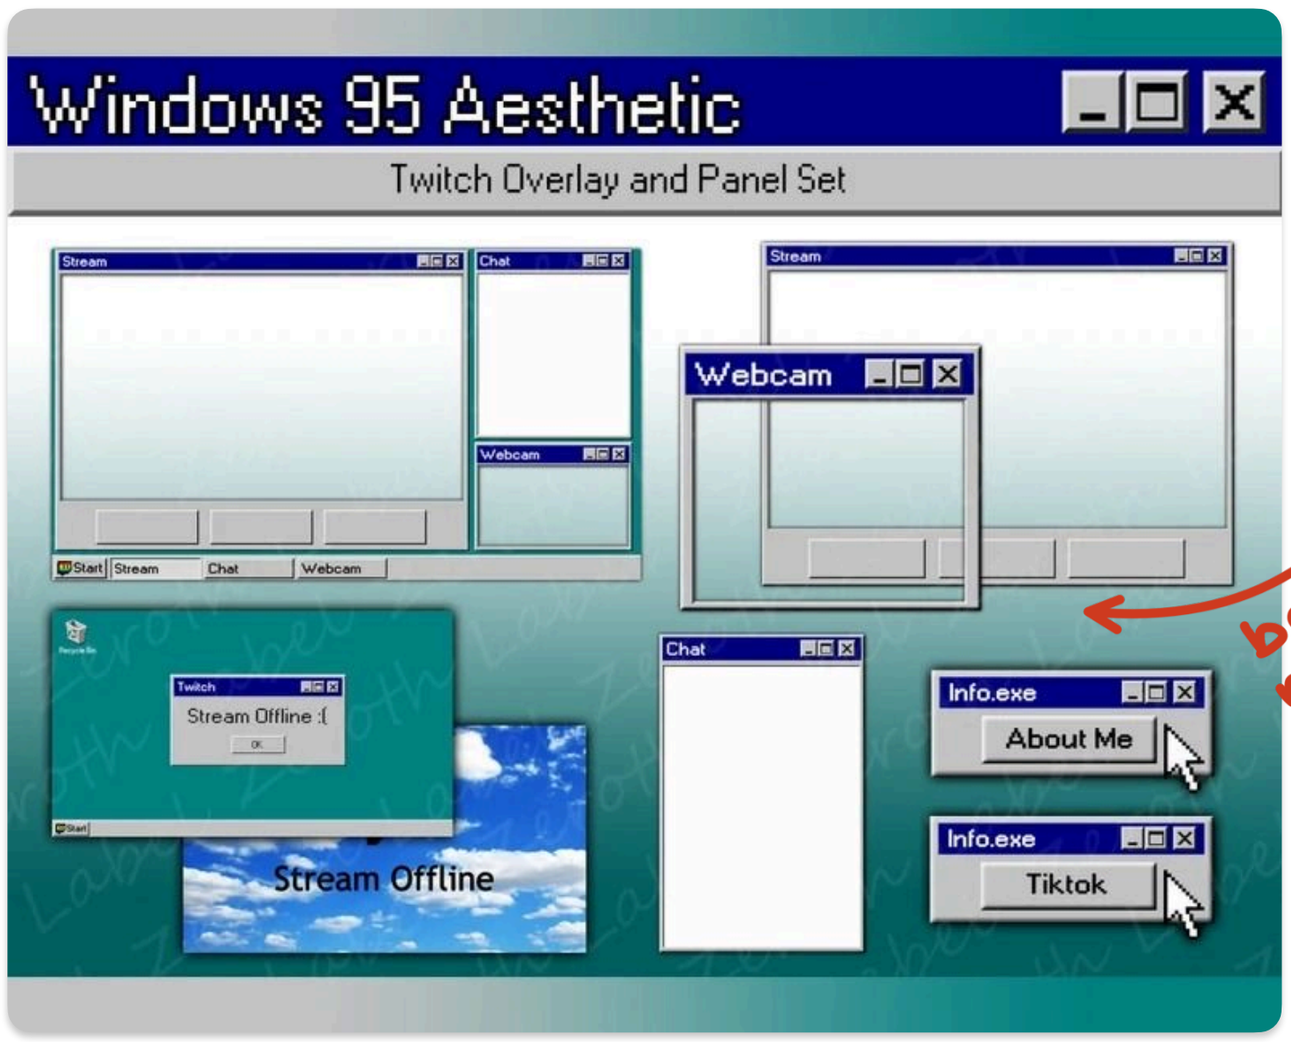

UI Prototype: make 1st in keynote

- currency can just be custom text (learn how to import fonts as a file)

don't add details just flat colours + buttons

plan layout / colours

better match
